

# LET'S MOBILIZE AGAINST CLIMATE CHANGE THROUGHOUT 2015

*To build the pressure needed for ambitious and just climate action, and transformational and sustainable public policies, close to 100 civil society organisations have collectively founded the French platform Coalition Climat 21.*

The fight for a safe climate for all neither begins nor ends with the Paris climate talks. But 2015 is our best moment in years to come together to demand the world we know is within our reach: a world with an economy that works for people and the planet; a world safe from the ravages of climate change; a world with good jobs, clean air and water, healthy communities and sustainable development for all. To change everything, it takes everyone. Join us at the following mass mobilisations, and together let's bend the course of history.

**On May 30th and 31st**, please help kickstart an international mobilization moment by calling out those responsible for climate change and call for the radical transformation of our development models through multiple actions, initiatives and demonstrations across France.

**On September 26th and 27th**, in Paris and cities across the country, and beyond, we will mobilize to support and showcase citizen-driven initiatives to address climate change and power the energy transition.

**On November 29th**, we'll take to the streets of Paris, and major cities across the world united in many voices for action on climate change. The weekend before the talks begin we'll get ahead of the politicians to set out people's demands for the world to know: from food, to jobs, to energy and poverty eradication.

**During the two weeks of the COP**, there will be more and more actions blooming, particularly in Paris.

**From December 5th** onwards, a big space for convergence, debates and mobilization will be open to all those who want to take part in this citizen mobilization as well as contribute to alternative solutions to climate change.

**On December 12th**, come to Paris and join the inspiring mass mobilisation to mark the peak of two-weeks of escalating actions. Let's come together and demonstrate the power of our movement and send a clear signal for a brighter, cleaner, safer and more just future for everyone.
